NEXT LEVEL SECURITY SYSTEMS PROVES INTEGRATION WITH ARECONT VISION MEGAPIXEL CAMERAS

*Testing in the MegaLab™ by Arecont Vision ensures the
NLSS Gateway's compatibility with leading developer of megapixel cameras*

Carlsbad, Calif. – March 1, 2011 – [Next Level Security Systems](#), a developer of a new breed of unified, networked security solutions, has announced that the [NLSS Gateway](#) successfully passed integration testing at the [MegaLab™ by Arecont Vision](#). The NLSS Gateway is now verified to integrate with [Arecont Vision](#) megapixel cameras supported in the dedicated IP video testing facility. The [integration matrix](#) on the MegaLab Web site includes a complete list of Arecont Vision features supported by the NLSS Gateway.

“Close technical partnerships and proven levels of integration are critical to providing customers with seamless security solutions that strengthen security programs,” said Jumbi Edulbehram, Vice President of Business Development, Next Level Security Systems. “Our success at Arecont Vision’s MegaLab demonstrates our commitment to providing IP security solutions that surpass customer expectations through technology innovation and collaboration with cutting-edge solution providers.”

The NLSS Gateway is a unified, networked security platform that integrates video management software, IP access control, video analytics and intrusion into a single platform. This [unique approach](#) allows data from these traditionally separate subsystems to be correlated without custom integration, while combined data is available to operators through a single, intuitive user interface.

The MegaLab, located at Arecont Vision’s headquarters in Los Angeles, ensures a high level of integration between Arecont Vision’s line of megapixel cameras and industry leading video management applications. The MegaLab is part of Arecont Vision’s Technology Partner Program, which was designed to further support partnerships between Arecont Vision, and VMS and software platform providers through tighter integration, sales collaboration and joint marketing.

“The Arecont Vision MegaLab enables us to prove an advanced level of integration with our technology partners such as Next Level Security Systems in a hands-on testing environment,” said Jason Schimpf, Director of Partner Relations, Arecont Vision. “The MegaLab certification provides our joint customers with seamlessly

integrated networked solutions, which helps further drive the adoption of IP-based, megapixel technologies.”

About Next Level Security Systems

Next Level Security Systems is a physical security company focused on developing a new breed of unified networked security solutions. Next Level’s products combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution. Led by a team of seasoned security executives and world-class engineers, Next Level was built around the core belief that exceptional performance and advanced technology should be both easy-to-use and affordable. The Next Level team’s mission is to develop advanced hardware and software products that set new standards in performance vs. cost. For more information on Next Level’s groundbreaking technologies, visit <http://www.nlss.com>.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. All-in-one products such as MegaDome® and MegaView™ provide installer friendly solutions. Compact JPEG and H.264 series of cameras address cost sensitive applications. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points.
