**Next Level Security Systems Honored with
2010 New Product of the Year Award**

*The NLSS Gateway presented as the winner of the Network-Centric Security category
in annual awards presented by Security Products magazine*

Carlsbad, Calif. – Sept. 1, 2010 – Next Level Security Systems (www.nlss.com), a developer of a new breed of unified, networked security solutions, was honored as the winner of Security Products magazine’s 2010 New Product of the Year for the NLSS Gateway. The NLSS Gateway was named the recipient of the award in the Network-Centric Security category.

“Our mission at Next Level Security Solutions is to deliver innovative yet cost-effective unified, networked solutions that increase security and operational efficiencies for our customers,” said Peter Jankowski, Chairman and CEO, Next Level Security Systems. “We’re extremely proud to have Security Products magazine recognize the value of the NLSS Gateway, which optimizes the power of the network to provide our customers with a comprehensive view of their security programs.”

The NLSS Gateway combines essential elements of a physical security solution, including video management, access control, video analytics, two-way audio and intrusion detection, into one appliance to provide seamless communication between systems. The NLSS Gateway supports multiple streams of digital video in various resolutions and formats, and supports access control panels and readers from one to hundreds of doors. The NLSS Gateway also offers key features such as auto discovery and auto provisioning of edge devices to simplify the installation process, and supports edge devices that incorporate PSIA and ONVIF specifications. This open, unified platform also includes a wide range of video analytics such as people counting, entry and exit monitoring, trip wire, loitering and face grabbing.

The Security Products New Product of the Year Award honors the outstanding product development achievements of security equipment manufacturers whose products are considered to be particularly noteworthy in their ability to improve security. In total, 90 entries were received, a 40 percent increase over 2009 entries. Winners are honored in eight distinct categories.

The NLSS Gateway is part of Next Level’s broad family of unified and intuitive networked solutions including the NLSS Gateway Micro, NLSS HD Media Decoder, and

NLSS MultiTouch Console. For further information on Next Level's comprehensive product line, visit booth #347 at the ASIS International 56th Annual Seminar & Exhibits in Dallas or visit <http://www.nlss.com>.

About Next Level Security Systems

Next Level Security Systems is a physical security company focused on developing a new breed of unified networked security solutions. Next Level's products combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution. Led by a team of seasoned security executives and world-class engineers, Next Level was built around the core belief that exceptional performance and advanced technology should be both easy-to-use and affordable. The Next Level team's mission is to develop advanced hardware and software products that set new standards in performance vs. cost.
