

PRESS RELEASE

**NEXT LEVEL SECURITY SYSTEMS PRESENTS UNIFIED SECURITY
SEMINAR WITH AXIS COMMUNICATIONS AND HID GLOBAL**

Event highlights benefits and efficiencies of open IP security solutions

Carlsbad, Calif. – August 10, 2011 – [Next Level Security Systems](#), a developer of a new breed of unified, networked security solutions, along with Axis Communications and HID Global presents a Unified Security Seminar on Aug. 11, 2011, in Chicago. Axis Communications is a leading provider of IP-based network video solutions and HID is a trusted leader in providing access control and secure identity solutions. The combination of these IP-based technologies with the NLSS Gateway, a unified security platform that integrates video management, access control and video analytics, into a single appliance, delivers a comprehensive security solution that maximizes value and reduces risks.

The seminar provides an opportunity for industry practitioners and installers to learn about the benefits of an integrated IP solution. Presented in a ‘lunch-and-learn’ format, the seminars include presentations from all three manufacturers, technology demonstrations and networking opportunities. The overall mission of the half-day seminar is to showcase the benefits of an integrated IP solution and allow attendees to view the complete solution in use. To register, visit the event’s [registration page](#).

“In the 15 years since the invention of the world’s first network camera, IP-based technologies have transformed the security industry through open partnerships and interoperability,” said Rob Muehlbauer, Business Development Manager, Application Development Partner Program, Axis Communications Inc. “These interactive seminars

are a great opportunity for us to connect with our partners and show our mutual customers the immediate and long-term value of a complete integrated solution.”

“As the leading provider of access control solutions, we’re proud to have Next Level Security Systems demonstrating a real-world implementation of our open ecosystem of products,” said Eric Widlitz, Managing Director, Identity and Access Management, Americas with HID Global. “By integrating both HID Global’s smart cards and IP-based, EDGE® door solutions, we are enabling a unified security platform that is superior, and more reliable and affordable than proprietary systems.”

"We are excited to have the opportunity to showcase the benefits of an integrated, open security system," said Jumbi Edulbehram, Vice President of Business Development, Next Level Security Systems. "This new approach to physical security, which incorporates integrated, open systems to minimize the complexity of customized integration and leverage the power of the network, offers an unprecedented level of insight into security operations.”

About Next Level Security Systems

Next Level Security Systems is a physical security company delivering a new breed of unified networked security technologies. The NLSS Gateway, Next Level’s flagship product, is an award-winning, IP-based security management platform that integrates video management, access control, video analytics and remote management into a single appliance. It is successfully used in the retail, commercial, education, transportation and government markets. All of Next Level’s products, sold through distribution worldwide, combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution.
