SCANSOURCE SECURITY ADDS HD MEDIA DECODERS FROM NEXT LEVEL SECURITY SYSTEMS TO SECURITY OFFERING

GREENVILLE, SC – ScanSource® Security, a business unit of ScanSource, Inc. (NASDAQ: SCSC), and a leading distributor of physical security solutions, has added Next Level Security Systems, a physical security company focused on developing a new generation of unified, networked security solutions, to its line card. Through this partnership, ScanSource Security will now offer Next Level’s comprehensive product line, beginning with the NLSS HD Media Decoder.

The NLSS HD Media Decoder provides a convenient way to display video from IP cameras and video encoders on LCD, LED and Plasma monitors or televisions. The NLSS HD Media Decoder can display up to four simultaneous streams of HD video to a single monitor and support multiple video pane layouts. The NLSS HD Media Decoder can also stream stored media content or available online content, making it ideal for digital signage or viewing video from the Internet.

“Next Level brings a relatively new offering to the security industry, enabling resellers to add more innovative solutions to their security offering,” said Paul Constantine, vice president of merchandising, ScanSource Security. “We look forward to offering their full suite of unified, networked products in the coming months.”

Next Level’s flagship product, the NLSS Gateway, is a networked solution that is integrated from the ground up, providing users with correlated information from multiple systems, including video management, access control, intrusion detection and video analytics. The NLSS Gateway and the NLSS Gateway Micro will be released at ASIS 2010.

“ScanSource Security has a proven track record for being at the front of the technological curve, and therefore, is a great fit for Next Level Security Systems,” said Jumbi Edulbehram, vice president of business development, Next Level Security Systems. “The combination of Next Level’s expertise in networked security solutions and ScanSource Security’s organizational strength and reach enables customers to access the most advanced yet cost-effective security solutions on the market.”
