

PRESS RELEASE

Next Level Security Systems Joins Advantage HID Channel Partner Program™
Partnership forms an essential link in the Genuine HID™ value chain

Carlsbad, Calif. – March 24, 2010 – Next Level Security Systems, a developer of a new breed of unified, networked security solutions, is pleased to announce that it has joined the Advantage HID Channel Partner program, a network of select OEMs, distributors, integrators, dealers and resellers committed to partnering with HID Global to ensure the integrity of the Genuine HID value chain.

“HID Global is a trusted developer of products that deliver secure identity and we are proud to join the Advantage HID Channel Partner network,” said Peter Jankowski, Chairman and CEO, Next Level Security Systems. “This strategic relationship will enable us to work closely with the HID team to provide fully interoperable solutions to the market at large.”

Current HID customers benefit from this strategic initiative as end users now have the opportunity to upgrade to an NLSS solution that incorporates the functionality of video surveillance, access control, video analytics and intrusion detection in one device while leveraging existing investments in HID Global’s interoperable secure identity technologies.

The Advantage HID Channel Partner program assures the delivery of superior quality and service to HID Global end users through a select network of sales channel partners. The Advantage HID Channel Partner program provides loyal, customer-focused sales partners exclusive access and advanced insight into HID Global developments, along with a comprehensive toolkit that bolsters the Advantage Partner’s ability to extend the Genuine HID value proposition to their customers.

“HID Global is pleased to have Next Level Security Systems as a partner of our Advantage HID Channel Partner program,” said Eric Widlitz, Managing Director, Americas, for HID Global. “Next Level Security Systems is an essential link in the Genuine HID value chain by providing superior end-user support, furthering to enhance HID Global’s reputation as a trusted brand.”

Next Level’s flagship product, the groundbreaking NLSS Gateway, integrates traditionally disparate subsystems into a completely unified networked solution from the ground up. The company’s IP-based technologies are built on open standards, including PSIA and ONVIF, offer a robust set of capabilities and are designed to be easy-to-configure but offered at a significantly lower cost than comparable solutions.

Next Level’s unified, networked security solutions, including those that have been integrated with HID secure identity technologies, will be on display at booth 6092 at the 2010 ISC West Conference and Exhibition, held March 24-26 at the Sands Convention Center in Las Vegas.

About Next Level Security Systems

Next Level Security Systems is a physical security company focused on developing a new breed of networked security solutions. Next Level's products combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution. Led by a team of seasoned security executives and world-class engineers, Next Level was built around the core belief that exceptional performance and advanced technology should be both easy to use and affordable. The Next Level team's mission is to develop advanced hardware and software products that set new standards in performance vs. cost. For additional information, visit <http://www.nlss.com>.
